ISINGLASS HOSPITALITY FURNITURE

Thinking Globally
Producing Locally

Manufactured in the USA

Who We Are :

Founded in 2003, Isinglass has been a fixture in the hospitality industry for nearly two decades, providing some of the finest properties around the globe with high quality tables, backbars, serving stations, displayware, and more.

Isinglass' signature style derives from the use of kiln-fired architectural glass to create tabletop displayware that echoes the sun-drenched ripples of Isinglass Lake, a hidden gem in Canada where CEO and Founder Wayne Poe's family friend spent many a happy childhood summer. We've come a long way since then, expanding our line to include furniture and display ware in a wide variety of materials and styles.

Today, we proudly offer our customers a range of fully customizable options in wood, steel, glass, quartz, and fiber resin. Most of our existing designs can be tweaked for size, finish, and material to meet your specifications. However, if we don't have the design you're looking for, we will gladly work with you to create pieces to suit your individual needs.

At Isinglass Designs, we embrace the intrinsic values that come with being a family-owned business and we take great pride in building strong, collaborative relationships with our customers. We believe that a successful business is built not only on providing our customers with outstanding products and service, but also in establishing and fostering those customer relationships. Our success will ultimately be measured by our clients choosing us because they believe in our ability to meet or exceed their expectations in service, quality and innovation.

In a nutshell, our philosophy is simple -

Our goal is achieved when our customers' needs have been met.

The Isinglass Difference:

Our products are made and manufactured in the USA. We ensure that we use high quality and environmentally friendly resources and that the quality control is exceptional. Plus manufacturing in the US gives us all an additional benefit: our turn-around time is stream-lined, allowing us to deliver to you much more quickly.

With Isinglass, you know you are choosing products specifically designed for the hospitality industry. You'll not only get the commercial strength you need but the designer look and feel you want. From the beginning, our focus has been to introduce unique products tailored specifically to meet the ever-changing and diverse needs of the hospitality industry. Your products will not only have an elevated design that easily integrates into your decor, but they will be functional and durable. Now, that's one smart investment.

Our Most Popular Fiber Resin Wood Grains

***Additional Fiber Resin Colors and Designs Available**

Fiber Resin Surfaces

Fiber Resin is a multi-layer material thermally fused to industrial grade particleboard or fiberboard core. Because it is thermally fused, the surface is permanently attached.

This process allows for your own custom graphic designs to be printed and inserted beneath a protective transparent layer.

Available in solid colors, wood grain and abstract decorative surface options

- Indoor / Outdoor Use
- Water / UVA / Scratch / Stain / and Chemical-resistant; SEFA. 8 Certified
- Specially developed for food contact and culinary preparation
- Easy to clean
- Food safe, earth-friendly
