

Our goal at Isinglass Designs is to provide you with the highest quality materials in the widest variety possible so that you can create custom pieces that suit your exact design needs. Our specialty glass is among our most popular tabletop options and is specially designed to be beautiful, durable, and practical enough for the hospitality industry.

---

### Acid-Etched Glass

Talk about stunning! Acid-Etched Glass features a chemically treated top layer that results in a matte, satin-like surface that adds dimension to any tabletop. Acid-Etched Glass is available in a variety of thicknesses, in colored glass, and with Back-Painted Glass to give you a wide range of options to suit your specific design needs. Up the impact of any piece with Acid-Etched Glass.

### Back-Painted Glass

You've invested a lot of time, thought, and money into creating the ideal design scheme for your property. What better way to show that scheme off than with complementary tabletops? Our Back-Painted Glass is durable and available in a variety of custom color options and glass thicknesses. Whether you want to match branding colors or to simply add a unique touch to your décor, Back-Painted Glass is perfect for commercial applications across your property, from conference rooms to dining spaces and everywhere in between.

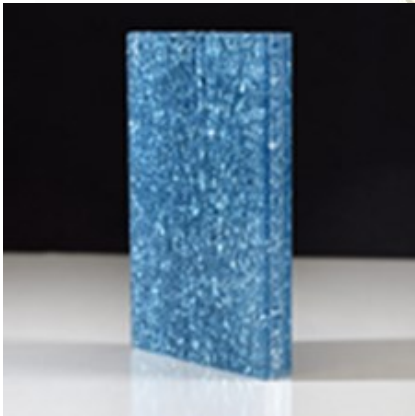

## Frosted Glass

The simple elegance of Frosted Glass belies the level of skill and experience needed to execute the skillfully sandblasted works of art that are made possible by our highly trained team. Our designers will even work with you to create a custom template for your own design. Imagine your logo or a special motif etched into glass tabletops to make a subtle but lasting impression on your guests.

## Crackle Glass

These stunning glass pieces are created by bonding three sheets of glass together and shattering the middle piece. The result is a mesmerizing tabletop that will be sure to catch your guests' attention. Available in thicknesses from  $\frac{3}{4}$  to  $1\frac{1}{4}$  inches, Crackle Glass also comes in both clear and colored glass varieties to ensure that you strike the exact design notes you're aiming for.

## Fusion Glass

Fired in specially built kilns, Fusion Glass is created by expert craftspeople by fusing glass to glass. The result is a remarkably clear glass that is available in a variety of colors and textures. Bold, beautiful, and captivating, Fusion Glass is available up to 3 inches thick to turn any table into a true work of art. Fusion Glass is ideal for creating elegant centerpieces for your design schema such as a statement table in your lobby or even as a bar top in your dining areas.

## Laminated Glass

Laminated glass is among our most popular offerings and for good reason! Using state-of-the-art technology, paper, film, or fabric is sealed between layers of glass to create beautiful custom pieces in  $\frac{3}{4}$  to 1" thicknesses. The possibilities for creating one-of-a-kind tabletops that are beautiful and durable. Plus, our talented craftspeople can "crackle" the inner layer of glass to create a shimmering, mirrored effect. Laminated glass is offered in clear, low iron, blue, gray, or bronze, and can also be back-painted to add additional depth to your designs.

## Edged Glass

What is Edged Glass? Think live-edge wood in glass form! Our skilled craftspeople custom edge your glass to your perfect profile and hand-polish it, resulting in a stunning finish that will add a subtle touch of glamor to any surface. This technique is available in clear or colored glass and in a variety of thicknesses to turn any table into a true show-stopper.
